PROFESSIONAL SUMMARY

Power BI Developer with 3+ years of hands-on experience designing interactive dashboards, building scalable data models, and delivering actionable business insights across Insurance, Healthcare, and Retail domains. Strong expertise in Power BI (Desktop & Service), DAX, Power Query, and Oracle SQL. Proven ability to reduce manual reporting time by up to 40%, implement secure RLS governance, and translate complex business requirements into data-driven solutions that support strategic decision-making.

TECHNICAL SKILLS

BI & Reporting	Power BI Desktop, Power BI Service, Report Builder, App Workspaces
DAX & Modeling	Measures, Calculated Columns, Time Intelligence, Star & Snowflake Schema
ETL & Query	Power Query (M Language), ETL Pipelines, Data Transformation & Cleansing
Visualizations	KPI Cards, Drill-Through, Tooltips, Custom Visuals, Hierarchies
Database	Oracle SQL, SQL Queries, Joins, Views, Stored Procedures
Governance	Row-Level Security (RLS), Data Gateways, Scheduled Refresh, Performance Optimization
Integration	Excel, Cloud Data Sources, Power Automate (Basic), Power BI REST API
Soft Skills	Requirement Gathering, Stakeholder Management, Business Analysis, Problem-Solving

PROFESSIONAL EXPERIENCE

Power BI Developer

2023 – Present

ACSASS IT | ITES — Chennai, India

Roles & Responsibilities:

- Designed and developed interactive Power BI dashboards with drill-down, hierarchy navigation, and KPI tracking across Retail, Healthcare, and Insurance domains.
- Integrated data from Oracle Server and Microsoft Excel into centralized data models, improving report performance and data refresh speed by up to 40%.**
- Engineered complex DAX measures, calculated columns, and optimized Star Schema models, significantly enhancing dashboard responsiveness for large-scale datasets.
- Implemented Row-Level Security (RLS) and configured On-Premises Data Gateways for secure, governed, role-based report access.
- Managed Power BI App Workspaces and deployment lifecycles, ensuring streamlined report distribution across multiple business units.
- Automated reporting workflows and optimized scheduled data refresh processes, reducing manual reporting time by 30–35%.**
- Proactively monitored Scheduled Refreshes and On-Premises Data Gateways, rapidly resolving data load failures to maintain continuous reporting availability.
- Published reports to Power BI Service with subscriptions and alerts, enabling real-time insights and self-service analytics for business leaders.
- Collaborated with cross-functional stakeholders to gather requirements and deliver customized visual reports aligned to business objectives.

PROJECTS

Client: Mercury General Corporation

Jan 2023 – Dec 2023

Domain: Insurance Workflow & Claims Analytics | Environment: Power BI, Oracle SQL

- Developed a Power BI solution to streamline insurance quotation and claims management with secure document generation, storage, and retrieval.

- Built dynamic dashboards to monitor global document flow, quotation volumes, and system performance across operations.
- Connected to Oracle SQL databases to extract, transform, and load data for real-time claim and quotation analytics.
- **Improved overall reporting efficiency by 40%, enabling faster turnaround on insurance quotations and claims processing.**
- Implemented role-based access controls and RLS data security protocols ensuring compliance with insurance industry standards.

Client: RPM

Jan 2024 – Jun 2025

Domain: Healthcare Performance Analytics | Environment: Power BI, Oracle SQL

- Developed an interactive analytics dashboard providing stakeholders a comprehensive view of health-related metrics for data-driven clinical decision-making.
- Designed and deployed Power BI dashboards to visualize patient outcomes, treatment efficiency, and critical operational KPIs.
- Integrated complex healthcare datasets from Oracle SQL into a centralized reporting solution enabling accurate and automated analytics.
- **Reduced manual reporting time by 35% through automated data refresh strategies and optimized ETL pipelines.**
- Created custom DAX measures and visuals to highlight trends in healthcare performance and hospital resource utilization.

Client: Arhaus

Jul 2025 – Present

Domain: Retail Sales Analytics | Environment: Power BI Desktop, Oracle Server, Microsoft Excel

- Designed zone-wise and product-wise interactive Power BI dashboards to analyze sales performance and product distribution across multiple geographic regions.
- Integrated and transformed large datasets from Oracle Server and Excel into a centralized Power BI data model for real-time retail analytics.
- Created custom DAX measures, calculated columns, and KPIs to monitor sales growth, product trends, and regional profitability.
- **Optimized report query structures and data refresh pipelines, improving refresh speed by 40% and reducing manual reporting time by over 30%.**

KEY ACHIEVEMENTS

- **Reduced manual reporting time by up to 40% across multiple enterprise clients by automating Power BI refresh workflows and optimizing data models.**
- **Delivered end-to-end BI solutions for 3 major clients — Arhaus, RPM, and Mercury General Corporation — across Retail, Healthcare, and Insurance sectors.**
- **Improved data refresh speed by 40% at Arhaus by restructuring Oracle + Excel data into an optimized centralized Power BI model.**
- **Cut healthcare reporting effort by 35% at RPM through ETL pipeline automation and optimized DAX calculations.**
- **Boosted insurance reporting efficiency by 40% at Mercury General Corporation through automated dashboards and Oracle SQL integration.**

EDUCATION

Master of Business Administration (HR & Finance)

2023

Kongu Arts and Science College, Bharathiar University | 77%

Bachelor of Science in Mathematics

2021

Bishop Heber College, Bharathidasan University | 74%
